ABSTRACT

Tables, graphs, and charts are provided in this report on trends in operational planning data in the Wisconsin Vocational, Technical and Adult Education (VTAE) system for the period from 1979-80 to 1988-89. Four operational data sets are analyzed: full-time equivalent (FTE) and headcount enrollments and cost per FTE; VTAE graduates; operational faculty and staff compensation; and district finances. Data are presented for the state as a whole and for each district. In addition, data are provided on new programs, school personnel and salaries, revenue sources, and tuition and fees. Highlighted findings include the following: (1) state VTAE FTE enrollment peaked in 1982-83 at 64,303, followed by declines ranging from 1% to 6.5% in most subsequent years, but an increase of 2.2% in 1988-89; (2) overall, only about 21% of program enrollments were full-time students; (3) 14 of 16 districts had a majority of female enrollments; (4) associate degree graduates represented an increasing proportion of the system's total number of graduates, growing from 38.8% in 1975-76 to 51.1% in 1988-89; and (5) the 113 new degree programs that were introduced between 1980 and 1989 produced 963 graduates in 1988-89. A final section lists several common, but mistaken beliefs about labor market projections, high technology occupations, enrollment management, and fiscal planning and management. (JMC)

EXECUTIVE SUMMARY

This is the fourth year of a study of operational planning data trends in the VTAE system. This study includes 1988-89 enrollment, graduation, and cost allocation data. The conclusions of the study are shown on page 88.

Four operational data areas have been analyzed in this report: FTE and head-count enrollments and cost/FTE, VTAE graduates, operational faculty and staff compensation, and district finances. Data is presented by state totals and for each district.

FTE Enrollment

State VTAE FTE enrollment peaked in 1982-83 at 64,303, declined 1% to 63,511 in 1983-84, 6.5% to 59,384 in 1984-85, and 2.4% to 57,935 in 1985-86; FTE increased .3% to 58,091 in 1986-87, decreased -2.5% to 56,622 in 1987-88, and increased 2.2% to 57,893 in 1988-89.

FTE enrollments by district are shown in Table 1 and Graph 1 for the years 1979-80 to 1988-89. Some trends are as follows:

1. Milwaukee 21.9% of 1988-89 state VTAE FTEs and Madison 12.8% have maintained about one-third of the state total FTEs over this period.
2. Four (4) districts decreased in enrollment over the nine-year period:

Waukesha	-7.7%
Western	-4.9%
Indianhead	-1.0%
Southwest	-0.4%

3. Eleven (11) districts increased over the nine-year period:

Mid-State	22.4%	Milwaukee	5.6%
Chippewa Valley	20.1%	Gateway	5.6%
Madison	14.9%	North Central	1.5%
Blackhawk	14.4%	Lakeshore	1.0%
Northeast	10.5%	Nicolet	0.9%
Fox Valley	8.6%		

Moraine Park had virtually the same FTE in 1979-80 (2,483) as 1988-89 (2,482). Some Significant changes from 1987-88 to 1988-89 by district are as follows:

1. Fourteen (14) of the 16 districts increased in FTE enrollment from 1987-88 to 1988-89 as follows:

Blackhawk	13.3%	Madison	2.1%
Mid-State	6.6%	North Central	1.6%
Gateway	6.0%	Milwaukee	1.1%
Indianhead	4.6%	Lakeshore	1.1%
Chippewa Valley	3.7%	Western	0.8%
Moraine Park	3.1%	Northeast	0.2%
Fox Valley	2.7%	Waukesha	0.1%

2. Two (2) districts decreased in FTE enrollment from 1987-88 to 1988-89:

Nicolet	-2.4%
Southwest	-0.8%

Full-Time and Part-Time Enrollments

There is great variance by district of the ratio of full-time to part-time program enrollments with Gateway having a ratio of .11 and Chippewa Valley .63, with a state average of .26. Some districts, notably Gateway and Madison, are assigning program codes to many part-time students. In the case of Gateway, it is probably because as many as 8,000 or more GOAL students are counted as program students. Overall, only about 21% of program enrollments in the state are considered full-time students.

Graduates, Full-Time Students, and New Program Enrollments

Highlights of 1988-89 graduates, ratio of graduates/FT, and nonprogram enrollments follow. The range of the ratio of graduates/FT goes from .96 at Southwest to .45 at Nicolet. Fox Valley has the highest percentage of nonprogram enrollments 86.3% and Gateway the lowest 62.4%. GOAL enrollees represent a large majority of Gateway program enrollments.

State FTE and Headcounts by Aid Code for Continuing Education

Highlights of headcount and FTE changes by Continuing Education Aid code are as follows:

1. Headcounts have declined 14.6% while FTEs decreased 21.1% from 1979-80 to 1988-89 in Continuing Education.
2. Government ABE programs are down significantly from 1979-80 to 1988-89:

Code 38 ABE 11,350 to 7,277 headcount.
3. GOAL enrollments increased from 7,303 to 27,248 headcount from 1979-80 to 1988-89. Only some of these enrollments are shown in Table 4 since most GOAL programs are coded 30.
4. General Adult, which includes basic skills training, is up from 70,915 to 89,513 from 1979-80 to 1988-89.
5. Avocational is down from 90,080 to 35,372 from 1979-80 to 1988-89.
6. Vocational-Adult headcounts began and ended the nine-year period with similar counts (242,128 and 254,535) while Community Service enrollments went down significantly (129,621 to 62,969).
7. Occupational Adult, a category which was not used in 1979-80, had a 162,381 headcount in 1988-89 which represented 37.2% of the total unduplicated headcount of 436,942.

Enrollment by Sex, Ethnic Origin, Handicapped, and Disadvantaged by District

1. Fourteen (14) of 16 districts have a majority of women students. Nicolet with 62.5% female had the highest percentage in 1988-89. Fox Valley with 44.9% female had the lowest.
2. Milwaukee (13,682 minority students) had 50% of the minority enrollment of 27,326 in 1988-89. A total of 23.5% of MATC-Milwaukee headcount enrollment was minority, including 9,707 blacks which represented 70% of black enrollment in the state.
3. Indianhead had the highest number of American Indian students with 611 in 1988-89.
4. With the exception of Gateway with 12.1%, North Central with 5.5%, and Milwaukee with 23.5% minority, all other districts had 4.0% or less minority enrollment.
5. A total of 1.8% of State VTAE enrollment is indicated as Handicapped, 1.1% as Limited English Proficient, and 14.4% as Disadvantaged.

State FTE and Headcount by Aid Code

Significant differences in headcount and FTE enrollments are:

1. College Parallel enrollments represented only 1.7% of headcount enrollments in 1979-80 and 1988-89, and 3.4% and 4.9% of FTEs the same years.
2. Associate Degree headcounts represent a relatively small percentage of headcount enrollment (14.3% in 1979-80 and 17.7% in 1988-89) but a majority of FTEs (46.3% and 53.7%).
3. Vocational headcount enrollments account for about twice the FTE enrollment (27.8% in 1988-89) as headcount (15.2%).
4. Vocational-Adult enrollments are increasing and represented 52.3% of headcount enrollment in 1988-89 while accounting for only 11.7% of FTEs. More than one-half of these enrollments are in code 47 (occupational adult) 162,381 out of 251,304 in 1988-89.
5. Community Service enrollments are declining and represent only 1.9% of FTEs and 13.1% of headcount enrollments in 1988-89.

Goal, ABE, ESL, and Basic Skills Enrollments

The GOAL program enrolled more students in 1988-89 (27,248) than any other program (Accounting is number 2 in enrollment 5,983). GOAL, ABE, Basic Skills, and ESL had a duplicated headcount of 55,089 and total state FTE of 5,409.79 (9.3% of all FTEs in the state in 1988-89).

Gateway had a 30-850-3 GOAL headcount enrollment in 1988-89 of 8,437 with 785 FTEs which represents 18% of Gateway's total FTE of 4,277. Gateway's total headcount in GOAL and ABE (8,628) is larger than Milwaukee's total (6,177). Milwaukee had the highest FTE (1,022) with Gateway second (793).

Adult High School or High School Courses

Milwaukee is the only district that has an Adult High School (State Code 34). Other districts offer high school courses that may be used as credits toward graduation from high schools. Significant changes in enrollment have taken place from 1979-80 to 1988-89 in these enrollments.

----- High School Course Enrollments -----				
1979-80		1988-89		
-----		-----		
	Hdct	FTE	Hdct	FTE

Milwaukee	6,688	577.56	3,840	902.19
Other 15 Districts	3,411	133.10	934	78.52

TOTAL	10,099	710.66	4,774	980.71

From 1979-80 to 1988-89:

Milwaukee headcount has decreased (2,848 or -4.3%).

Milwaukee FTE has increased (324 or +56%).

Other 15 districts' headcount decreased (2,477 or -73%).

Other 15 districts' FTE decreased (54 or -41%).

FTE and Costs by State Code 1979-80 to 1988-89

Some trends in Operational Costs and Cost/FTE by Aid Category for all districts from 1979-80 to 1988-89 are as follows:

1. The percentage of Associate Degree enrollments has increased from 46% of total FTE (25,276 out of 54,550) in 1979-80 to 54% (31,174 out of 57,893) in 1988-89.
2. College Parallel and Associate Degree enrollments have increased 50% and 23% respectively while Vocational, Vocational-Adult, and Community Services have decreased 8%, 4%, and 62% respectively. Total FTE enrollment increased 6% over the nine-year period.
3. Costs per FTE have increased more rapidly for College Parallel (118%), Associate Degree (110%), and Vocational (96%) than for Vocational-Adult (47%) while Community Services costs increased slightly (6%). Overall costs per FTE increased 91%.

FTE and Costs by Instructional Division 1979-80 to 1988-89

Some trends indicated during this nine-year period are as follows:

1. General Education generated more FTEs 22,085 in 1988-89 (38% of total) than any other division. Business with 15,134 in 1988-89 produced 26% of total FTEs and is second highest. General Education and Business FTEs have increased 23% and 16% respectively from 1979-80 to 1988-89.

2. The Technical division FTEs had the highest percentage increase (42%) Television excepted. Technical FTEs increased from 2,245 in 1979-80 to 3,191 in 1988-89.
3. Four divisions decreased in FTE from 1979-80 to 1988-89: Agriculture 20%, Graphics 16%, Home Economics 23%, and Industrial 32%.
4. Direct Instructional Costs for the Technical division increased 171% as compared to total instructional costs of 130% for all divisions.
5. Costs (130%) and Cost/FTE (117%) increased at a faster rate than FTEs over the nine-year period from 1979-80 to 1988-89. FTEs have increased 6% to 1988-89.

Graduates 1975-76 to 1988-89

Some trends are as follows:

1. The number of graduates has increased in seven years and decreased in six years over the thirteen-year period. The largest percentage change was a 12% increase in 1978-79 and 1980-81. The largest decrease was 10.7% in 1984-85. This also represents the largest change in numbers from 16,622 graduates in 1983-84 to 14,844 in 1984-85 (-1,778).
2. The proportion of graduates by aid category to total has been changing from 1975-76 to 1988-89.
 - a. Associate Degree increased from 38.8% (4,373) of total graduates to 51.1% (6,952).
 - b. Two-year and one-year diploma decreased from 6.0% (676) to 4.8% (658) and 43.0% (4,847) to 26.4% (3,600), respectively.
 - c. Short-term graduates increased from 12.2% (1,376) to 17.7% (2,408) of total in 1988-89, but peaked in 1981-82 at 17.8% (2,763) of total.

Highlights of programs with more than 100 graduates per year are as follows:

1. The 39 programs with 100 or more graduates at any time over the 13-year period represent 13% of the 289 degree, diploma, or certificate programs with graduates in 1988-89. These 39 programs contributed 64% of the total 13,618 graduates in 1988-89. The 39 programs had more than 60% of the total graduates in most years since 1974-75.
2. The Business Division produces more graduates from programs with more than 100 graduates than any other division (3,106 in 1988-89).
3. The Nursing Assistant program produces more graduates than any other individual program, 1,350 in 1988-89. This one program produced more graduates in 1988-89 than the 113 new programs started since 1980 in the VTAE System (963 graduates).

=====

TOP TEN PROGRAMS STATEWIDE AND BY DISTRICT BY NUMBER OF GRADUATES IN 1988-89

=====

Rank	Name of Program	No. of Graduates	Cumulative % of Total Graduates	Total FTE	Cumulative % of Total FTE
STATEWIDE					
1	30-510-1 Nursing Assistant	1,350	9.3%	272	0.5%
2	10-101-1 Accounting	796	14.7%	2,747	5.2%
3	10-510-1 Nursing	634	19.1%	2,057	8.8%
4	10-104-3 Marketing	464	22.3%	1,669	11.7%
5	10-504-1 Police Science	346	24.7%	1,359	14.0%
6	10-107-1 Data Processing	334	27.0%	1,319	16.3%
7	30-090-1 Farm Training	278	28.9%	205	16.6%
8	10-605-1 Electronics	267	30.7%	858	18.1%
9	10-106-2 Adm Asst-Secretarial	247	32.4%	958	19.8%
10	31-509-1 Medical Assistant	224	33.9%	317	20.3%
TOTAL		4,940	14,556 Total State Graduates	11,761 *	57,893 Total Program State FTE*

Top 10 include:
 2 Short Term (30)
 1 1-Year Diploma (31)
 7 Associate Degree (10)
 New programs in state since 1980 = 0

=====

*NOTE: FTE by program includes all courses that are part of the program, both occupational and general education. Program FTEs are used in all district tables that follow.

There are 338 programs in the state that have at least one graduate. Ten (3%) of programs in state VTAE produce 33.9% of graduates and 20.3% of FTEs.

New Programs Since 1980 to 1989

The 113 new degree and diploma programs from 1980 to 1989 produced 963 graduates or about 7% of the 13,618 degree and diploma graduates in 1988-89 (does not include apprentice, college parallel, and JTPA). New apprentice programs produced 264 graduates. Most apprentice programs were started before 1980 but did not receive state approval until after 1980.

The top ten new (since 1980) degree, diploma, or certificate programs in respect to graduates in 1988-89 are:

Rank	Program	District	Year Approved	Graduates Statewide
1	31-101-2 Microcomputer Acctg Specialist	(4 Districts)	1985	93
2	31-107-3 Office Computer Specialist	(Western)	1982	58
3	31-106-8 Information Processing Specialist	(North Central)	1985	43
4	30-404-9 Parts Specialist	(4 Districts)	1980	38
5	10-503-2 Fire Protection Technology	(2 Districts)	1980	34
6	10-107-5 Microcomputer Application Analyst	(2 Districts)	1985	33
7	31-421-2 Mechanical and Computer Drafting	(4 Districts)	1985	33
8	30-001-5 Basic Horticulture	(Madison)	1984	27
9	31-107-6 Computer Operator	(Fox Valley)	1985	25
10	10-605-8 Electronics - Telecommunications	(3 Districts)	1984	23

Operational Staff and Average Compensation

1. Milwaukee had the highest average compensation, including benefits, from 1979-80 to 1984-85 but was surpassed by Madison from 1985-86 to 1988-89. Other districts changed greatly over the nine-year period in rank of compensation; for example, decreasing were Gateway 4 to 13 and Blackhawk 8 to 16; increasing were Fox Valley 14 to 4 and Waukesha 11 to 3.
2. Waukesha had the highest average increase in compensation \$22,329 (109%) and Blackhawk had the smallest increase \$11,941 (58%) from 1979-80 to 1988-89.
3. Because of great variation by district in distribution of employees by category, only total operational staff data was used.

Table 14 shows 1988-89 faculty compensation in rank order from highest to lowest. The range is from Milwaukee \$50,597 (includes salary and fringe benefits) to Western \$39,063.

Finances - Operational and Debt Service Mill Rates, Tax Levy, Valuation, State Aid, and Cost/FTE

Tables 15 and 16 show mill rates and tax levies by district for 1979-80 and 1989-90, respectively. Some highlights are as follows:

1. Southwest, which had the highest total mill rate in 1989-90 at 1.932 was fifth in 1979-80 at 1.263.
2. Milwaukee had the highest total mill rate from 1979-80 to 1984-85 but dropped to number 2 in 1985-86, to number 4 in 1986-87, and to number 5 in 1989-90. Milwaukee had the highest mill rate for years prior to 1979-80.
3. Blackhawk had the largest increase in total mill rate .857 (88%) from 1979-80 to 1989-90.

4. Madison had the smallest increase in mill rate .263 (21%).

5. Northeast had the lowest total mill rate in 1989-90 (1.436) and Waukesha had the lowest operational mill rate of 1.37016.

Table 17 shows changes in valuation by district from 1979-80 to 1989-90. While all districts except Southwest show increases in valuation from 1979-80 to 1989-90, a majority of districts (12) decreased in valuation from 1985-86 to 1986-87. Some highlights of changes in valuation from 1979 to 1989 are as follows:

1. Waukesha had the highest percentage increase, 63.05%.

2. Southwest decreased 7.82%.

3. Milwaukee had the largest dollar value increase in valuation \$6,899,128,540 (33.91%) followed by Madison \$4,868,686,954 (44.75%).

Table 18 shows the changes in valuation between 1988-89 and 1989-90 (TID OUT) with the statewide total increasing 5.16%.

1. Waukesha had the largest percentage increase 9.1% (\$1,024,833,219).

2. Milwaukee had the largest dollar increase \$1,709,064,519 (6.69%).

3. All districts increased for the first time since this study was started four years ago.

Table 19 shows the Cost/FTE by District for 1987-88 and 1988-89.

1. Nicolet and Waukesha had the highest cost/FTE in both years.

2. In 1988-89, six districts were above the state average cost/FTE, \$6,271 (Nicolet, Waukesha, Southwest, North Central, Moraine Park, and Fox Valley) and ten districts were at or below (Blackhawk, Lakeshore, Milwaukee, Indianhead, Gateway, Mid-State, Chippewa Valley, Northeast, Madison, and Western).

Table 19A shows District Costs, Indirect Costs, and Total Cost/FTE by District for 1988-89. Waukesha has the highest direct cost/FTE, \$6,169; Nicolet has the highest indirect cost/FTE, \$2,145, and the highest total cost/FTE, \$7,930. Western has the lowest direct cost/FTE, \$4,070, and Northeast the lowest indirect cost/FTE, \$1,026.

Table 20 shows Aidable Costs by District for 1988-89. Milwaukee had the highest net aidable amount, \$66,599,667; Nicolet had the lowest aidable amount, \$4,701,275.

State aids for 1988-89 are shown in Table 21. Seven districts (Chippewa Valley, Southwest, Blackhawk, Lakeshore, Mid-State, North Central, and Nicolet) received supplemental aids totaling \$1,850,925 over the state aids allocated by formula.

Tuition in Wisconsin Technical Colleges

VTAE college parallel tuition (\$796) for 16 credits per semester in 1989-90 is second only to UW-Madison and UWM at \$896.50 per 16 credits in the University System. Tuition has increased by \$484 or 605% to \$564 for 16 credits of VTAE associate degree courses from 1975-76 to 1988-89. Comparatively from 1975-76 to 1988-89, UW two-year center tuition has increased by \$363.50 or 139% to \$625.50.

Tuition or Fees at Community or Technical Colleges in the United States as Compared to Wisconsin

It is not possible to get exact comparisons of tuition/fees for community colleges across the United States. Different sources give variant information but it is possible to classify states in general terms as to the level of their tuition/fees.

It is also not possible to get precise comparisons of sources of revenue for community colleges across the United States. Different definitions are often used for local or state revenue sources. For example, "local" does not consistently mean "local property tax" but is often anything except federal and state support and state tuition.

However, some general conclusions and comparisons can be made regarding Wisconsin Technical Colleges.¹

1. Wisconsin is the only state that differentiates in tuition between occupational associate degree and college parallel.
2. Wisconsin is near the median in tuition charges for public two-year colleges.
3. Wisconsin may have the highest local taxes for two-year colleges in the United States (see Table 2.2 Percent of Operating Funds by Source).
4. The proportion of revenues from local taxes for Wisconsin two-year technical colleges may be the highest in the United States.* In 1985-86, 54% of VTAE revenues came from local taxes. Sources of revenues by state obtained from a 1989 AACJC publication shows only one state, Arizona 51%, received more than 50% of its revenues from local sources. There are only 3 states out of 49 (Wisconsin, Arizona, and Oregon 44%) that received more than 35% of revenue locally. In the great majority of cases, it is less than 30% and in some it is less than 1%.

* Source of data: Community Colleges in the United States: Forty-Nine State Systems, Ben E. Fountain and Terrance A. Tollefson, AACJC 1989. Data in this publication is for 1985-86 or 1986-87 in most cases. More recent comparable data for the same year is not available.

¹Tuition or fees at Community Colleges in the United States, Dennis W. Redovich, Milwaukee Area Technical College, October 1989.

Students in technical colleges in Wisconsin are paying tuition at a level that is beyond their means and at the same time local property taxpayers are paying the highest proportion of costs for technical colleges in the United States.

5. Wisconsin is like all other states except Florida in having a uniform tuition for occupational associate degree and diploma/certificate courses.

Wisconsin has one of the highest tuitions in the United States for college parallel courses. In the United States, university tuition is on the average twice the two-year college rate. Tuition for college parallel courses at Wisconsin Technical Colleges is higher than tuition of the UW four-year cluster and two-year centers.

I. INTRODUCTION

In July 1985, the Research, Planning, and Development Administrators Committee published "Strategic Planning Process: Update 1984-85" which described the elements of Strategic Planning and presented a progress report on implementation of Strategic Planning with the VTAE districts. This report addresses operational planning which follows strategic planning in the overall planning process. The diagram below represents the continuous relationship of the district planning process.

Operational planning data is necessary in order to prepare specific operational plans. This operational data includes such areas as enrollment, graduates, programs offered, program costs, tax rate and levy, and valuation of property. This report includes some operational planning data in these areas.

Acknowledgments - State VTAE Board personnel provided the necessary base data by year that was used in this report. Ronald Braem, Catherine Cotter, James Halloran, Norman Kenney, and Robert Millard of the State Board staff provided input to this report. Judy Molzen, MATC Research Secretary, is responsible for the preparation of the manuscript.

II. ANALYSIS OF FTE ENROLLMENTS IN THE VTAE SYSTEM 1979-80 TO 1988-89

State VTAE FTE enrollment peaked in 1982-83 at 64,303, declined 1% to 63,511 in 1983-84, 6.5% to 59,384 in 1984-85, and 2.4% to 57,935 in 1985-86; FTE increased .3% to 58,091 in 1986-87, decreased -2.5% to 56,622 in 1987-88, and increased 2.2% to 57,893 in 1988-89.

FTE enrollments by district are shown in Table 1 and Graph 1 for the years 1979-80 to 1988-89. Some trends are as follows:

1. Milwaukee 21.9% of 1988-89 state VTAE FTEs and Madison 12.8% have maintained about one-third of the state total FTEs over this period.
2. Four (4) districts decreased in enrollment over the nine-year period:

Waukesha	-7.7%
Western	-4.9%
Indianhead	-1.0%
Southwest	-0.4%

GRAPH 1

FTE ENROLLMENT BY DISTRICT 1979-80 TO 1988-89

GRAPH 1 (CONTINUED)

FTE ENROLLMENT BY DISTRICT 1979-80 TO 1988-89

3. Eleven (11) districts increased over the nine-year period:

Mid-State	22.4%	Milwaukee	5.6%
Chippewa Valley	20.1%	Gateway	5.6%
Madison	14.9%	North Central	1.5%
Blackhawk	14.4%	Lakeshore	1.0%
Northeast	10.5%	Nicolet	0.9%
Fox Valley	8.6%		

Moraine Park had virtually the same FTE in 1979-80 (2,483) as 1988-89 (2,482). FTE enrollments for 1987-88 and 1988-89 by district are shown in Table 2 and Graph 2. Some significant changes from 1987-88 to 1988-89 are as follows:

1. Fourteen (14) of the sixteen districts increased in FTE enrollment from 1987-88 to 1988-89 as follows:

Blackhawk	13.3%	Madison	2.1%
Mid-State	6.6%	North Central	1.6%
Gateway	6.0%	Milwaukee	1.1%
Indianhead	4.6%	Lakeshore	1.1%
Chippewa Valley	3.7%	Western	0.8%
Moraine Park	3.1%	Northeast	0.2%
Fox Valley	2.7%	Waukesha	0.1%

2. Two (2) districts decreased in FTE enrollment from 1987-88 to 1988-89:

Nicolet	-2.4%
Southwest	-0.8%

Full-Time and Part-Time Enrollments

Table 3 shows total unduplicated headcount, full-time and part-time program enrollments, and the ratio of FT/PT. There is great variance by district with Gateway having a ratio of .11 and Chippewa Valley .63 with a state average of .26. Some districts, notably Gateway and Madison, are assigning program codes to many part-time students. In the case of Gateway, it is probably because as many as 8,000 or more GOAL students are counted as program students. Overall, only about 21% of program enrollments in the state are considered full-time students.

Graduates, Full-Time Students, and New Program Enrollments

Table 3 also shows 1988-89 graduates, the ratio of graduates/FT, and non-program enrollments. The range of the ratio of graduates/FT goes from .96 at Southwest to .45 at Nicolet. Fox Valley has the highest percentage of nonprogram enrollments 86.3% and Gateway the lowest 62.4%. GOAL enrollees are a majority of Gateway program enrollments.

TABLE 2
FTE ENROLLMENT BY DISTRICT
1987-88 and 1988-89

Rank 88-89	Rank 87-88	87-88		88-89		Change 87-88 to 88-89

FTE ENROLLMENT BY DISTRICT 1988-89

The eight (8) districts with less than 5% of the 1988-89 FTE enrollment together comprised 26.4% of the total.

TABLE 3

State FTE and Headcounts by Aid Code for Continuing Education

Table 4 shows the Headcount and FTE changes by Continuing Education Aid Code from 1979-80 to 1988-89. Associate degree, college parallel, and codes 11, 30, 31, 32 Vocational are not included because program FTEs in these categories are not comparable to course FTEs used in other sections of this report.

1. Headcounts have declined 14.6% while FTEs decreased 21.1% from 1979-80 to 1988-89 in Continuing Education.
2. Government ABE programs are down significantly from 1979-80 to 1988-89:
Code 38 ABE 11,350 to 7,277 headcount.
3. GOAL enrollments increased from 7,303 to 27,248 headcount from 1979-80 to 1988-89. Only some of these enrollments are shown in Table 4 since most GOAL programs are coded 30.
4. General Adult, which includes basic skills training, is up from 70,915 to 89,513 from 1979-80 to 1988-89.
5. Avocational is down from 90,080 to 35,372 from 1979-80 to 1988-89.
6. Vocational-Adult headcounts began and ended the nine-year period with similar counts (242,128 and 254,535) while Community Service enrollments went down significantly (129,621 to 62,969).
7. Occupational Adult, a category which was not used in 1979-80, had a 162,381 headcount in 1988-89 which represented 37.2% of the total unduplicated headcount of 436,942.

Enrollment by Sex, Ethnic Origin, Handicapped, and Disadvantaged by District

Table 5, 1988-89, shows FTE, Total Headcount, Male, Female, Ethnic Group, Handicapped, Limited English Proficiency, and Total Disadvantaged (unduplicated count of economic, academic, and LEP enrollments) by district for 1988-89. Some highlights for 1988-89 are as follows:

1. Fourteen (14) of 16 districts have a majority of women students. Nicolet with 62.5% female had the highest percentage in 1988-89. Fox Valley with 44.9% female had the lowest.
2. Milwaukee (13,682 minority students) had 50% of the minority enrollment of 27,326 in 1988-89. A total of 23.5% of MATC-Milwaukee headcount enrollment was minority, including 9,707 blacks which represented 70% of black enrollment in the state.
3. Indianhead had the highest number of American Indian students with 611 in 1988-89.

*FTE within aid categories is based upon course and program code.
FTE in other tables and in total represents course FTEs.

**Duplicated headcount.

NOTE: FTEs are counted by programs and courses. For example: a district submits an FTE record for a student in a diploma course. This record also indicates that the student is in an Associate Degree program. On a course basis FTE summary, the FTEs will be counted as Vocational and Associate Degree based upon the courses. In this summary, the FTEs will be combined based on the program code and will be counted in the Associate Degree aid category.

Source: VTAE Student Accounting System
MTC Research, Planning, and Development
DR:jm 11/21/89

NOTE: Minority enrollment was NOT adjusted for those students whose race was not known.
Some districts have significant numbers of students whose race is not identified.

4. With the exception of Gateway with 12.1%, North Central with 5.5%, and Milwaukee with 23.5% minority, all other districts had 4.0% or less minority enrollment.
5. A total of 1.8% of State VTAE enrollment is indicated as Handicapped, 1.1% as Limited English Proficient, and 14.4% as Disadvantaged.

State FTE and Headcount Enrollment by Aid Code

Comparison of Percentage of Total Enrollment by
Aid Code for Statewide Headcount and FTE

Aid Code	1979-80				1988-89			
	Headcount		FTE		Headcount		FTE	
	No.	% of Total	No.	% of Total	No.	% of Total	No.	% of Total
College Parallel	8,974	1.7%	1,858	3.4%	8,399	1.7%	2,822	4.9%
Associate Degree	73,488	14.3%	25,276	46.3%	84,760	17.7%	31,077	53.7%
Vocational	80,745	15.7%	17,038	31.2%	72,762	15.2%	16,122	27.8%
Voc-Adult	208,934	40.7%	7,419	13.6%	251,304	52.3%	6,787	11.7%
Community Service	140,912	27.5%	2,959	5.4%	62,969	13.1%	1,085	1.9%
TOTAL	513,053	100.0%	54,550	100.0%	480,194	100.0%	57,893	100.0%

Significant differences in headcount and FTE enrollments are:

1. College Parallel enrollments represented only 1.7% of headcount enrollments in 1979-80 and 1988-89, and 3.4% and 4.9% of FTEs the same years.
2. Associate Degree headcounts represent a relatively small percentage of headcount enrollment (14.3% in 1979-80 and 17.7% in 1988-89) but a majority of FTEs (46.3% and 53.7%).
3. Vocational headcount enrollments account for about twice the FTE enrollment (27.8% in 1988-89) as headcount (15.2%).
4. Vocational-Adult enrollments are increasing and represented 52.3% of headcount enrollment in 1988-89 while accounting for only 11.7% of FTEs. More than one-half of these enrollments are in code 47 (occupational adult) 162,381 out of 251,304 in 1988-89.
5. Community Service enrollments are declining and represent only 1.9% of FTEs and 13.1% of headcount enrollments in 1988-89.

GOAL, ABE, ESL, and Basic Skills Enrollments

The GOAL program enrolled more students in 1988-89 (27,248) than any other program (Accounting is number 2 in enrollment 5,983). GOAL, ABE, Basic Skills, and ESL had a duplicated headcount of 55,089 and total state FTE of 5,409.79 (9.3% of all FTEs in the state in 1988-89). Table 5A.

Gateway had a 30-850-3 GOAL headcount enrollment in 1988-89 of 8,437 with 785 FTEs which represents 18% of Gateway's total FTE of 4,277 (Tables 5B and 5C). Gateway's total headcount in GOAL and ABE (8,628) is larger than Milwaukee's total (6,177). Milwaukee had the highest FTE (1,022) with Gateway second (793).

Adult High School or High School Courses

Milwaukee is the only district that has an Adult High School (State Code 34). Other districts offer high school courses that may be used as credits toward graduation from high schools. Significant changes in enrollment have taken place from 1979-80 to 1988-89 in these enrollments.

High School Course Enrollments				
	1979-80		1988-89	
	Hdct	FTE	Hdct	FTE
Milwaukee	6,688	577.56	3,840	902.19
Other 15 Districts	3,411	133.10	934	78.52
TOTAL	10,099	710.66	4,774	980.71

From 1979-80 to 1988-89:

- Milwaukee headcount has decreased (2,848 or -4.3%).
- Milwaukee FTE has increased (324 or +56%).
- Other 15 districts' headcount decreased (2,477 or -73%).
- Other 15 districts' FTE decreased (54 or -41%).

FTE and Costs by State Code 1979-80 to 1988-89

Table 6 and Graph 2 show Operational Costs and Cost/FTE by Aid Category for all districts from 1979-80 to 1988-89. Trends in FTE by aid category are shown in Graph 2 to 1988-89. Some trends indicated from 1979-80 to 1988-89 are as follows:

1. The percentage of Associate Degree enrollments has increased from 46% of total FTE (25,276 out of 54,550) in 1979-80 to 54% (31,174 out of 57,893) in 1988-89.
2. College Parallel and Associate Degree enrollments have increased 50% and 23% respectively while Vocational, Vocational-Adult, and Community Services have decreased 8%, 4%, and 62% respectively. Total FTE enrollment increased 6% over the nine-year period.
3. Costs per FTE have increased more rapidly for College Parallel (118%), Associate Degree (110%), and Vocational (96%) than for Vocational-Adult (47%) while Community Services costs increased slightly (6%). Overall costs per FTE increased 91%.

FTE and Costs by Instructional Division 1979-80 to 1988-89

Table 7 shows Direct Costs, FTE, and Cost/FTE for all districts from 1979-80 to 1988-89. Table 8 and Graph 3 show FTE enrollment trends by instructional division from 1979-80 to 1988-89. Some trends indicated during this nine-year period are as follows:

GRAPH 3
FTE BY INSTRUCTIONAL DIVISION
1979-80 to 1988-89

1. General Education generated more FTEs 22,085 in 1988-89 (38% of total) than any other division. Business with 15,134 in 1988-89 produced 26% of total FTEs and is second highest. General Education and Business FTEs have increased 23% and 16% respectively from 1979-80 to 1988-89.
2. The Technical division FTEs had the highest percentage increase (42%) Television excepted. Technical FTEs increased from 2,245 in 1979-80 to 3,191 in 1988-89.
3. Four divisions decreased in FTE from 1979-80 to 1988-89: Agriculture 20%, Graphics 16%, Home Economics 23%, and Industrial 32%.
4. Direct Instructional Costs for the Technical division increased 171% as compared to total instructional costs of 130% for all divisions.
5. Costs (130%) and Cost/FTE (117%) increased at a faster rate than FTEs over the nine-year period from 1979-80 to 1988-89. FTEs have increased 6% to 1988-89.

III. ANALYSIS OF VTAE GRADUATES 1975-76 TO 1988-89

Table 9 and Graph 4 show trends in graduates from 1975-76 to 1988-89. Some trends are as follows:

1. The number of graduates has increased in seven years and decreased in six years over the thirteen-year period. The largest percentage change was a 12% increase in 1978-79 and 1980-81. The largest decrease was 10.7% in 1984-85. This also represents the largest change in numbers from 16,622 graduates in 1983-84 to 14,844 in 1984-85 (-1,778).
2. The proportion of graduates by aid category to total has been changing from 1975-76 to 1988-89.
 - a. Associate Degree increased from 38.8% (4,373) of total graduates to 51.1% (6,952).
 - b. Two-year and one-year diploma decreased from 6.0% (676) to 4.8% (658) and 43.0% (4,847) to 26.4% (3,600), respectively.
 - c. Short-term graduates increased from 12.2% (1,376) to 17.7% (2,408) of total in 1988-89, but peaked in 1981-82 at 17.8% (2,763) of total.

*Does not include Apprentices, JTPA (CETA) completers, or Associate in Arts.

GRAPH 4
NUMBER OF VTAE GRADUATES
1976-89

Table 10 shows the trends from 1975-76 to 1988-89 of programs with more than 100 graduates per year. Some highlights are as follows:

1. The 39 programs with 100 or more graduates at any time over the 13-year period represent 13% of the 289 degree, diploma, or certificate programs with graduates in 1988-89. These 39 programs contributed 64% of the total 13,618 graduates in 1988-89. The 39 programs had more than 60% of the total graduates in most years since 1974-75.
2. The Business Division produces more graduates from programs with more than 100 graduates than any other division (3,106 in 1988-89).
3. The Nursing Assistant program produces more graduates than any other individual program, 1,350 in 1988-89. This one program produced more graduates in 1988-89 than the 113 new programs started since 1980 in the VTAE System (963 graduates).

Table 11 shows total 1987-88 and 1988-89 graduates and includes JTPA, Apprentice, and College Parallel. These graduates have not been shown in the past in state graduation totals. The 723 graduates in 1987-88 of these programs represent 4.9% of total graduates and 727 or 5.1% of graduates in 1988-89 and should be included in state reports of graduates.

More than one-half (6,952) of all VTAE graduates in 1988-89 are from associate degree programs.

TABLE 11

Indianhead has 53 State Code 10, 30, 31, or 32 programs with graduates.

Median Salaries of VTAE Graduates

The median salary of all graduates in the state in 1988 was \$14,448 annually with a range of \$22,152 for Nursing-Technical to \$7,068 for Food Institutional graduates.

MATC-Milwaukee research on MATC graduates in 1988 indicates that median salaries in service and health occupations have surpassed technical and industrial graduates in recent years. As a result, female graduates at MATC have average starting salaries that are higher than males in many cases. The highest average salary at MATC was earned by Dental Hygienists at \$23,460 (78 graduates statewide in 1988).

IV. NEW PROGRAMS 1980-1989

Table 12 is a list of 194 new programs that have been approved by the State Board from 1980 to 1989. One hundred and thirteen (113) of these programs are degree or diploma programs and 81 are apprentice programs. The top ten new programs from 1980 to 1988 in number of graduates are as follows:

Rank	Program	District	Year Approved	Graduates Statewide
1	31-101-2 Microcomputer Acctg Specialist	(4 Districts)	1985	93
2	31-107-3 Office Computer Specialist	(Western)	1982	58
3	31-106-8 Information Processing Specialist	(North Central)	1985	43
4	30-404-9 Parts Specialist	(4 Districts)	1980	38
5	10-503-2 Fire Protection Technology	(2 Districts)	1980	34
6	10-107-5 Microcomputer Application Analyst	(2 Districts)	1985	33
7	31-421-2 Mechanical and Computer Drafting	(4 Districts)	1985	33
8	30-001-5 Basic Horticulture	(Madison)	1984	27
9	31-107-6 Computer Operator	(Fox Valley)	1985	25
10	10-605-8 Electronics - Telecommunications	(3 Districts)	1984	23

The 113 new degree and diploma programs from 1980 to 1989 produced 963 graduates or about 7% of the 13,618 degree and diploma graduates in 1988-89. New apprentice programs produced 264 graduates. Most apprentice programs were started before 1980 but did not receive state approval until after 1980.

TABLE 12

V. ANALYSIS OF FTE OPERATIONAL STAFF AND AVERAGE
COMPENSATION BY VTAE DISTRICT 1979-80 AND 1988-89

Table 13 shows the number of operational staff equivalents, average compensation, and change for 1979-80 and 1988-89 for each VTAE District. Operational staff are those financed from General and Restricted Revenue Funds and do not include staff funded under Auxiliary or Public Service functions. The number of teaching staff equivalents is determined for each district by dividing the total personal services dollar amount by the average full-time teacher's annual salary and fringe benefits to arrive at a full-time staff. Some highlights of trends in number of operational staff and average compensation are as follows:

1. Milwaukee had the highest average compensation, including benefits, from 1979-80 to 1984-85 but was surpassed by Madison from 1985-86 to 1988-89. Other districts changed greatly over the nine-year period in rank of compensation; for example, decreasing were Gateway 4 to 13 and Blackhawk 8 to 16; increasing were Fox Valley 14 to 4 and Waukesha 11 to 3.
2. Waukesha had the highest average increase in compensation \$22,329 (109%) and Blackhawk had the smallest increase \$11,941 (58%) from 1979-80 to 1988-89.
3. Because of great variation by district in distribution of employees by category, only total operational staff data was used.

Table 14 shows 1988-89 faculty compensation in rank order from highest to lowest. The range is from Milwaukee \$50,597 (includes salary and fringe benefits) to Western \$39,063.

VI. ANALYSIS OF OPERATIONAL AND DEBT SERVICE MILL RATES, TAX LEVIES,
VALUATION, COST/FTE, AND STATE AIDS BY DISTRICT 1979-80 TO 1989-90

Tables 15 and 16 show mill rates and tax levies by district for 1979-80 and 1989-90, respectively. Some highlights are as follows:

1. Southwest, which had the highest total mill rate in 1989-90 at 1.932 was fifth in 1979-80 at 1.263.
2. Milwaukee had the highest total mill rate from 1979-80 to 1984-85 but dropped to number 2 in 1985-86, to number 4 in 1986-87, and to number 5 in 1989-90. Milwaukee had the highest mill rate for years prior to 1979-80.
3. Blackhawk had the largest increase in total mill rate .857 (88%) from 1979-80 to 1989-90.
4. Madison had the smallest increase in mill rate .263 (21%).
5. Northeast had the lowest total mill rate in 1989-90 (1.436) and Waukesha had the lowest operational mill rate of 1.37016.

Table 17 shows changes in valuation by district from 1979-80 to 1989-90. While all districts except Southwest show increases in valuation from 1979-80 to 1989-90, a majority of districts (12) decreased in valuation from 1985-86 to 1986-87. Some highlights of changes in valuation from 1979 to 1989 are as follows:

1. Waukesha had the highest percentage increase, 63.05%.
2. Southwest decreased 7.82%.
3. Milwaukee had the largest dollar value increase in valuation \$6,899,128,540 (33.91%) followed by Madison \$4,868,686,954 (44.75%).

Table 18 shows the changes in valuation between 1988-89 and 1989-90 (TID OUT) with the statewide total increasing 5.16%.

1. Waukesha had the largest percentage increase 9.1% (\$1,024,833,219).
2. Milwaukee had the largest dollar increase \$1,709,064,519 (6.69%).
3. All districts increased for the first time since this study was started four years ago.

*Rank from greatest percent of increase (1) to greatest percent of decrease (16).

Table 19 shows the Cost/FTE by District for 1987-88 and 1988-89.

1. Nicolet and Waukesha had the highest cost/FTE in both years.
2. In 1988-89, six districts were above the state average cost/FTE, \$6,271, (Nicolet, Waukesha, Southwest, North Central, Moraine Park, and Fox Valley) and ten districts were at or below (Blackhawk, Lakeshore, Milwaukee, Indianhead, Gateway, Mid-State, Chippewa Valley, Northeast, Madison, and Western).

Table 19A shows Direct Costs, Indirect Costs, and Total Cost/FTE by District for 1988-89. Waukesha has the highest direct cost/FTE, \$6,169; Nicolet has the highest indirect cost/FTE, \$2,145, and the highest total cost/FTE, \$7,930. Western has the lowest direct cost/FTE, \$4,070, and Northeast the lowest indirect cost/FTE, \$1,026.

Table 20 shows Aidable Costs by District for 1988-89. Milwaukee had the highest net aidable amount, \$66,599,667; Nicolet had the lowest aidable amount, \$4,701,275.

State aids for 1988-89 are shown in Table 21. Seven districts (Chippewa Valley, Southwest, Blackhawk, Lakeshore, Mid-State, North Central, and Nicolet) received supplemental aids totaling \$1,850,925 over the state aids allocated by formula.

	\$84,979,900	100.0%	\$1,850,925	\$87,800,825	100.00%

*Nicolet received supplemental state aids for College Parallel courses in 1985-86 and 1986-87 of \$856,200 in both years; \$996,529 in 1987-88; and \$970,000 in 1988-89 which is included in the \$1,613,176 total above.

VII. TUITION IN WISCONSIN TECHNICAL COLLEGES

As shown in Table 22 and Graph 5, VTAE college parallel tuition (\$796) for 16 credits per semester in 1989-90 is second only to UW-Madison and UWM at \$896.50 per 16 credits in the University System. Tuition has increased by \$484 or 605% to \$564 for 16 credits of VTAE associate degree courses from 1975-76 to 1988-89. Comparatively from 1975-76 to 1988-89, UW two-year center tuition has increased by \$363.50 or 139% to \$625.50.

=====

Tuition numbers in tables do not include fees. Fees vary widely by school depending upon services provided by fees (example: health services, student facilities, books, etc.). Students at VTAE schools are not provided all of the services which are provided in the UW System and paid for by students with segregated fees.

COMPARISON OF VTAE AND UW SYSTEM UNDERGRADUATE RESIDENT TUITION

VIII. TUITION OR FEES AT COMMUNITY OR TECHNICAL COLLEGES
IN THE UNITED STATES AS COMPARED TO WISCONSIN

It is not possible to get exact comparisons of tuition/fees for community colleges across the United States. Different sources give variant information but it is possible to classify states in general terms as to the level of their tuition/fees.

It is also not possible to get precise comparisons of sources of revenue for community colleges across the United States. Different definitions are often used for local or state revenue sources. For example, "local" does not consistently mean "local property tax" but is often anything except federal and state support and state tuition.

However, some general conclusions and comparisons can be made regarding Wisconsin Technical Colleges.¹

1. Wisconsin is the only state that differentiates in tuition between occupational associate degree and college parallel.
2. Wisconsin is near the median in tuition charges for public two-year colleges.
3. Wisconsin may have the highest local taxes for two-year colleges in the United States (see Table 2.2 Percent of Operating Funds by Source).
4. The proportion of revenues from local taxes for Wisconsin two-year technical colleges may be the highest in the United States.* In 1985-86, 54% of VTAE revenues came from local taxes. Sources of revenues by state obtained from a 1989 AACJC publication shows only one state, Arizona 51%, received more than 50% of its revenues from local sources. There are only 3 states out of 49 (Wisconsin, Arizona, and Oregon 44%) that received more than 35% of revenue locally. In the great majority of cases, it is less than 30% and in some it is less than 1%.

Students in technical colleges in Wisconsin are paying tuition at a level that is beyond their means and at the same time local property taxpayers are paying the highest proportion of costs for technical colleges in the United States.

* Source of data: Community Colleges in the United States: Forty-Nine State Systems, Ben E. Fountain and Terrance A. Tollefson, AACJC 1989. Data in this publication is for 1985-86 or 1986-87 in most cases. More recent comparable data for the same year is not available.

¹Tuition or fees at Community Colleges in the United States, Dennis W. Redovich, Milwaukee Area Technical College, October 1989.

** 1986-87 reported data

NOTE: These are as reported by state officials and a few do not total 100%.

Source: Financing Community Colleges, 1988, AACJC.

Highlights

78.5% or 33 states of 42 above had local operating funds of 30% or less.

42.2% or 19 had 0% to 1% local operating funds.

11.9% or 5 had more than 30% local.

4.8% or 2 had more than 40% local.

4.8% or 2 had more than 50% local--Wisconsin and Kansas.

5. Wisconsin is like all other states except Florida in having a uniform tuition for occupational associate degree and diploma/certificate courses.

Wisconsin has one of the highest tuitions in the United States for college parallel courses. In the United States, university tuition is on the average twice the two-year college rate. Tuition for college parallel courses at Wisconsin Technical Colleges is higher than tuition of the UW four-year cluster and two-year centers.

CONCLUSIONS

The following are conclusions of the author based upon analysis of operational planning and other data not included in the text.

1. Enrollment in VTAE schools is more dependent upon economic and social changes than population changes. Availability of employment, economic, and social forces determine the number of people who enter postsecondary education and the level of education selected (diploma, certificate, associate degree, bachelor's degree).
2. In the last twenty years, college enrollments in the United States, including two-year institutions, have increased by more than 50% even though the number of high school graduates has decreased by more than 15%. In the state of Wisconsin, the percentage of students continuing their education has also increased dramatically and the percentage of dropouts is declining.
3. The quality of education in a majority of high schools has improved in the last ten years. The number of high school dropouts in Wisconsin has decreased from 17,222 in 1977-78 to 8,280 in 1987-88.
4. The technical colleges in the state of Wisconsin are the major providers of postsecondary education for minorities. More than 6% of technical college headcount enrollments are minorities.
5. A major stabilizing influence on technical college enrollments in the last five years or more is the increasing FTEs being generated by GOAL programs and Basic Skills courses. Some districts would have declined in enrollment without these FTEs in the last five years.
6. There does not seem to be significant unnecessary duplication of programs between districts. Over time since the 1960s, each VTAE district has developed programs and curricula that are designed to meet the needs of the local communities. One hundred ninety (190, 56.2%) of 338 programs with graduates are offered in only one district. Only 3 programs are offered in all 16 districts.
7. Attempts by the State Board to regionalize programming are unnecessary. Market forces determine the vitality of programs in each district and local boards are very conscious of costs. It is unfair to local residents to have to travel to other communities at considerable individual cost when it is not necessary. Voluntary cooperative efforts between districts in programming may be required.
8. Graduates from the VTAE system are primarily from long-established programs (office occupations, distributive education, service and health occupations, technical, and industrial). In 1988-89 about two-thirds (64%) of the graduates of the system were from 39 (12%) of the 338 programs producing graduates.
9. Technological change, primarily microcomputers and computer-related equipment, has provided new tools for established professions and VTAE programs. Students must learn to utilize these new tools and VTAE education must provide state-of-the-art equipment for its occupational programs.

10. New programs provide relatively few graduates in the VTAE system. The 113 new degree, diploma, and certificate programs approved by the state since 1980 produced 963 or 6.7% of all graduates in 1988-89. This does not mean that VTAE schools are not responsive to change. VTAE schools are flexible and respond to the needs of business and industry by updating long-established programs and providing customized courses and training activities. Emerging new occupations having all new occupational tasks are few in number.
11. VTAE programs grow, decline, and die primarily because of "market forces" and student demand and not often because of deliberate planning and projecting. Market forces are primarily motivated by employment availability and volume of jobs available. A small number of occupational groups account for the majority of total job growth in the state and nation (retail sales workers, waiters and waitresses, nurses, custodial workers, general managers and executives, cashiers, office clerks, etc.). Nursing Assistant programs in the VTAE system produced more graduates in 1988-89 (1,350) than the 113 new associate degree, diploma, and short-term programs (963) approved by the state since 1980.
12. The reason that the VTAE system cannot precisely project emerging occupations and enrollments in individual programs is that "experts" are unable to project anything precisely for any length of time because economic and social forces can change (up, down, and sideways) quickly while reliable projections depend upon a relatively unchanging future. High technology emerging occupations provide a relatively small number of jobs.
13. District boards and administrators are responsive to the needs of the community including the effects of VTAE educational programming on the taxpayers of their district. State aid support for VTAE has declined from 37% to 29% since the 1970s. While Wisconsin residents pay one of the highest local taxes for technical colleges, state aids are one of the lowest as percentage of revenues in the United States.
14. Tuition and fees for VTAE students is above their ability to pay and is a negative economic factor affecting enrollments. This is illustrated by study of the starting salaries of graduates. Service and Health Occupations are replacing technical and industrial as the highest paying occupations. Nursing at \$22,152 per year has the highest median salary for graduates of all programs in the state in 1988. The median salary of graduates was \$14,448 annually in 1988 which is about \$7.00 per hour with a 40-hour week.
15. One of the reasons technical college tuition has been increasing in double digit percentages is that costs for fee exempt courses are used in calculating tuition for students in courses in which tuition is charged. GOAL, ESL, and Basic Skills courses alone represented 9.3% of FTEs statewide in 1988-89. Other nontuition FTEs, such as Adult High School, made the total FTEs statewide about 14% of total 57,893 FTEs. Tuition-paying students are subsidizing fee exempt programs.
16. Programs with few or no graduates provide individual courses that are utilized for job training. Over 80% of VTAE program students are enrolled in fewer than 12 credits in a given semester. A majority of MATC students are interested in completing selected courses rather than a program. Only 5% of total headcount enrollment are full-time students enrolled in programs.

COMMON MYTHS IN THE VTAE SYSTEM

The following myths were first published in this study in 1989. These myths are harmless general statements that are said by "experts" and repeated by others. They are harmless because specific action is seldom taken based on them because no one really knows what to do. However, the system is often criticized for not acting on them. The writer has not heard any challenges to these myths as yet, but welcomes them.

Labor Market Information and Projections

1. a. Labor market demand can be projected quantitatively for individual VTAE programs statewide or by district if only someone gathered the "right" data and organized it properly.
OR
b. Statewide assessment of employer training needs can be carried out and used to determine training needs for all new or existing programs in the districts.
2. There is a large and significant mismatch of jobs and qualified people.
3. VTAE Districts or a State VTAE system can alleviate identified mismatching by adding new programs.
4. Future labor market projections can be used as the primary criterion for discontinuing a currently viable program.

High Tech

1. "High-Tech" occupations are the emerging high employment growth occupations of the future.
2. VTAE schools are not responsive to demands by business and industry for new "High-Tech" programs in emerging and growth occupations.
3. Because of "high tech," workers will change their basic occupations many more times in the future than workers did in the past.
4. Because of "high tech," there are many new occupations that do not exist today that will employ large numbers of people in the 1990s and the next century.

Enrollment Management

1. Centralized statewide planning and analyses can correctly determine the level of support and extent of offerings required by the competing needs of occupational education and training, adult basic education, college parallel, customized training, technical assistance, and student support services statewide.
2. Student demand can be accurately projected and enrollments in programs effectively controlled on a statewide basis to satisfy the "needs" of students and business and industry.

High School Education in Wisconsin

1. The quality of high school graduates is declining in Wisconsin in most schools.
2. High school dropout rates and numbers have increased in the last ten years in Wisconsin.

Fiscal Planning and Management

Basic Assumptions for VTAE Central Planning

1. District boards and district administrators are not concerned about duplication of programs and services, personnel and operational costs, and are not familiar with taxpayer "needs."
2. District boards and district administrators are not able to effectively control costs because their primary concern is to please all special interests in the district and offer every program and service possible regardless of cost.
3. District boards and district administrators are political, arrogant, and do not react to the needs of the community or business and industry.
4. Statewide planning is less political, more responsive and flexible, reduces costs, and will better meet the "needs" of the people and business and industry of the state.
5. Cost reductions require that programs be discontinued. Districts cannot reduce costs sufficiently by cutting back on course offerings, departments, services, operations, and administration.

Meaningful cost reductions require that some personnel be laid off. Shifting and retraining of personnel and not filling positions of personnel who leave voluntarily is not satisfactory since no employees are hurt by these procedures, which is a sign of weak management and failure to "bite the bullet."

6. Districts at the 1.50 mill rate are the highest cost/FTE districts and are poorly managed.
7. The vocational-technical student's ability to pay is similar to UW students.
8. District boards are not concerned about costs and are responsible for a great amount of unnecessary and costly expansion of VTAE facilities. State Board and state staff continually approve costly expansions without careful review of "needs" and cost.

All of the above basic assumptions are false in the opinion of the writer. Individual examples may be found which would support the statements, but in most cases the opposite of the above is true.

The opinions expressed in this report are those of the writer and not necessarily those of all of the State Research, Planning, and Development Committee or State Board staff who reviewed this report prior to publication. Responses by committee members and state staff to drafts of data and conclusions in the report were generally favorable.

A small number of occupations will account for more than one-half of total job growth.

Most of these occupations are growing faster than the average for all occupations.

Those growing less rapidly are very large, so that the numerical increase is still great.

Twelve of the twenty fastest growing occupations provide health services.

The number of paralegal personnel—the fastest growing occupation—is expected to double.

Four of the twenty fastest growing occupations are in the computer field.
